

## ***Remember and ACT!***

### ***Project summary:***

Analysis of hate data collected by members of the International Network Against Cyber Hate, INACH, in Europe has shown that there are strong and documented links between current online hate phenomena and hate-slurs, prejudices and practices that have been propagated in the Third Reich. To transform these worrisome findings into effective warnings, especially since remembrance and knowledge on the Holocaust and its horrors are fading, the project **Remember and ACT! (Re-ACT)** is putting a special focus on researching how “old” concepts of antisemitism and antigypsyism are being re-enacted by concerted hate campaigns and where they originated from. Starting from there, Re-ACT will develop, collect and provide educational materials and tools for the prevention of racism, xenophobia, homophobia and other forms of intolerance. These self-generated sets of information plus a curated collection of high-quality educational materials will build the foundation for the establishment of an online prevention-hub at INACH.

***Project duration:*** 1<sup>st</sup> February 2020 – 30<sup>th</sup> January 2022

### ***Project coordinator:***

The International Network Against Cyber Hate, **INACH**, is uniting civil society organizations all over Europe and beyond since 2002 in their collective fight for human rights online.

With project Re-ACT, this unique network of anti-discrimination organizations continues its efforts in strengthening transnational co-operation against hate online by providing its collaborators with a solid collection of methods, tools and materials for education and prevention measures.

Project Re-ACT is funded by the European Union’s Rights, Equality and Citizenship Programme (2014-2020). The contents of this document are the sole responsibility of the project consortium and can in no way be taken to reflect the views of the European Commission.

### **Project partners:**

**ROMEIA** is a Czech non-governmental organization with a long history of working in the area of media literacy particularly in relation to understanding the content related to discrimination, hate, and fake news. By bringing in special knowledge and expertise on researching and analyzing antigypsyism, ROMEIA is in charge of designing the methodology and implementation of research and will contribute to the development of dissemination and educational materials.

The International League against Racism and Anti-Semitism, **LICRA**, based in France, is one of the oldest international non-governmental organizations fighting racism, antisemitism and discrimination. In project Re-ACT, LICRA is overseeing the research activities and production of analytical papers, factsheets and information materials for the projects target audience and public outreach activities.

The research company **SYNYO** has been acting as a reliable coordinator and partner in several EU-funded projects and has a strong record of experience in empirical research, requirements analysis and dissemination as well as in developing highly intuitive knowledge, information and collaboration platforms. The core activity of SYNYO in Re-ACT will be the development and design of the prevention hub.

### **Additional cooperation partners:**

Additional partnerships with the European Union of Jewish Students, **EUJS**, and the European Roma Grassroots Organisations Network, **ERGO**, will allow for even more input to the needs analysis and exchange on a European level and an audience-targeted dissemination of the projects findings and results. As one of the leading providers of diversity education and training in Europe, the third cooperation partner **CEJI** - a Jewish Contribution to an Inclusive Europe, will play a pivotal role in sharing its knowledge and expertise for developing suitable materials.

In the course of the project, more strategic partnerships will be sought to ensure a vibrant use and exchange of educational materials and knowledge via the prevention-hub.
